DETAILED ACTION

Allowable Subject Matter

1. Claim 1-7 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Prior art fails to disclose or suggest, inter alia, a power factor controller in a regulated power supply circuit, comprising separating load and line regulations in the power supply circuit and providing a modulator module for the line regulation in which switching frequency is inversely proportional to the square of the line voltage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 6,900,623 Yang et al disclose a power supply utilizing pulse width modulation incorporating a squaring function; US Martinelli discloses a power factor correction control circuit ; US 5,602,465 Clemente discloses a circuit to improve output voltage regulation of a power factor stage.
